What kind of Internet connection do we have?
We have a full gigabit (1 Gbps) GigE FDX Full Duplex Fiber internet connection. When guests & meeting planners compare bandwidth to a "T1 line", our connection is the equivalent of *650 T-1 lines* or *22 DS-3 lines*.

Wireless in Meeting Rooms
Our wireless network is designed from the group up or high density and high usage specifically designed for "a lot of people on the internet at the same time!" In the Regency Ballroom the system can handle 2000+ devices at the same time on the internet. In the Plaza & Georgia Ballrooms the system can handle 600+ devices on the internet at the same time. Wireless support includes 802.11abgn.

Wireless in Guest Rooms
Every guest room has access to a wired and wireless connection. Wireless support includes 802.11abgn
