Denmark's most striking and unique congress hall

Kim Utzon is the architect behind Tivoli Hotel & Congress Center. Throughout his distinguished career he has exhibited an astute ability to synthesise functionality and lighting in a process that produces magnificent architecture.

Tivoli Hotel & Congress Center is a spectacular example of Utzon's architectural achievements. The pyramid-shaped windows along the Congress Hall's ceiling drench the hall in daylight, whilst in the process ensuring a perfect indoor climate.

The 1,500 m² sized hall is designed to adapt easily to all kinds of events; conferences, exhibitions and product launches, etc. A 500 m² balcony, relocatable stage, three fixed screens and the latest AV equipment all add up to an international standard congress hall. The acoustics are also perfectly balanced, so that the hall can be used for intimate lectures or dinners.

Let's tailor your meeting, conference or event

It's easy to arrange meetings and events at Tivoli Hotel & Congress Center. Just leave it to us. You'll be assigned one of our Event Managers, who will be in close consultation with you regarding everything from general enquiries about holding the event to set-up, refreshments, team-building, AV requirements and accommodation. And if you're short on inspiration or ideas for your event, for example entertainment or particular refreshments, then we can help with that, too. The possibilities are many, and you'll be surprised at what can be achieved.

The key to a better environment

Green Key is an independent, international marketing scheme. In order to be awarded a Green Key, one must first fulfil a number of mandatory and optional criteria regarding energy and water usage, sustainable food, staff involvement, etc.

We believe that we can create memorable and comfortable experiences for our guests, while at the same time taking an active role in improving the environment, by:

- reducing our waste and waste material as well as lowering our energy and water consumption to an extent that is practically possible
- using products with the least impact on the environment
- demanding that our suppliers deliver products and services that live up environmentally to Green Key criteria
- help our guests to find healthy, green activities during their stay at our hotels
- handle environmental enquiries and, moving forward, to set new environmental goals in an open and positive consultation with customers, employees, authorities, suppliers, organisations and other interested parties

All Arp-Hansen Hotel Group's 12 hotels, including Tivoli Hotel & Congress Center, hold the Green Key environmental certificate

Atmosphere is also what you don't see

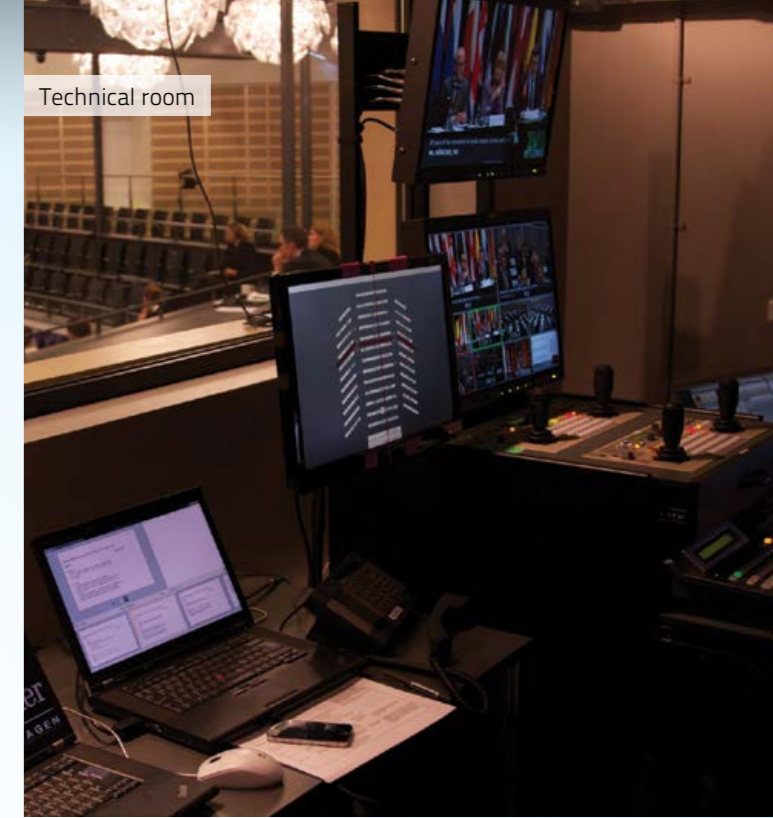

The acoustics in the Congress Hall are exceptional. In the company of 600 people, you can almost whisper to one another. This means an end to exhausting background noise at large meetings, conferences and dinners.

If, on the other hand, you need to turn up the volume, our sound system is sublime. Even experienced concert organizers will be able to appreciate the uncompromising sound experience. In essence, this is a congress hall that is so versatile that it can be used for much more than conferences.
