Strategically situated at the tail end of the most beautiful beach in the Riviera Maya, **The House of AïA** brings us **Palmaïa**, an exclusive beach enclave focused on connecting us to nature, ourselves, and the sanctity of life.

Every effort was taken to ensure the original landscape remain untouched to feel the healing authenticity of old-growth trees and naturally occurring cool-water cenotes.

All guests reside in ocean-front suites: some with swim-out access to the infinity pools, others with sweeping views of the sea, and a few nestled among the ocean-side mangroves.

Guests also enjoy high-end amenities without sacrificing environmentally friendly practices, while the restaurants offer the best cuisine in the region, extensive plant-based options, and impeccable style.

But even still, the real jewels are the **Architects of Life** and **Rituals of Sound** programs.

ARCHITECTS OF LIFE

From visiting gurus, nomadic clairvoyants, and teachers with great ancestral knowledge, they form a cradle of wisdom that we have adopted and from which we can learn, so that we are capable of loving nature as oneself.

Our Architects of Life program has been carefully designed and led by our resident **Personal Growth Guide**, encompassing a wide variety of practices and rituals for all to join and learn from; taking place in different locations and times throughout the week.

It is the most comprehensive personal development program ever offered at any resort in the world.

Our main objective is to achieve a connection with oneself, with our tribe and with AiA, through a deep personal exploration through the physical and the subconscious with activities such as **Meditation, Mind Control, Gravity Control, Tibetan Bowls, Gong Baths, Cacao Ceremony, Primal Move**, and more.

RITUALS OF SOUND

Musical rhythms in their raw form transpose us, transport us and set us free, while connecting one with the whole.

Each week we select deep rhythms that awaken the sacred DNA of our ancestors with the latest in deep fusion electronic music as well as **international guest DJs** playing in tandem with acoustic live instruments.
